

RV SnapPad - Proudly made in the USA

About **SnapPad**

RV SnapPad is a new style of jack pad designed to be permanently attached to 9" round metal feet

8 Benefits of **SnapPad**

1. Tough - Made from sturdy recycled rubber and tested to withstand 10,000+ lbs. SnapPad's won't deform, crack, or break under pressure.

2. Safe for all surfaces - Use on any surface without worrying about shifting or damage, including concrete, asphalt, grass, gravel and mud.

3. Innovative Design - SnapPads add an additional 36 sq/in to the 9" metal landing foot, bringing the surface area to 94 sq/in total - a 61% increase.

4. More storage space - No more stacks of dirty wet blocks to store anymore.

5. Environmentally responsible - made from 100% recycled tires, SnapPads keep used rubber out of landfills.

6. Aesthetics - Gives any motorhome, fifth wheel, toy hauler or trailer a clean, professional look.

7. Protects - Rubber SnapPad eliminates rust and protects metal feet from damage caused by rock and gravel.

8. Scientifically tested - Independently tested, SnapPad's are proven to withstand extreme temperatures ranging from +120 F down to -40 F. They are also vertically-shake tested at over 100 times the force of gravity.
